LIGHT VEHICLE TYRES

We understand that the success of your business is determined by your ability to reliably meet your customers' needs at a price that is affordable in these economically challenging times, while still making a reasonable margin that helps sustain and grow your business.

We have identified a set of serious manufacturers that produce a range of quality tyres that meet light vehicle requirements at a price point that is fair for the South African consumer. To ensure we offer you reasonable price security, we source tyres from several manufacturers on a competitive basis.

LANVIGATOR

Budget SUV and PCR tyres can be found in the Lanavigator range. The tyres perform very well and meet your customer's aesthetic requirements and they are significantly more cost effective than the more established brand label tyres.
